

Prolight UL-220 DH

The portable lighting set was created for long-term operation. This is a unique solution for both the technical industry and rescue services. The floodlight has two movable lighting heads, which allows you to direct the light beam in any direction. Thanks to the included power supply, you can smoothly adjust the light power up to 17,000 lm. The lamp can work in five modes: Eco (1000 lm), Balanced (3800 lm), Standard (6300 lm), Turbo (10,000 lm) and network (17,000 lm). The device's operating time is up to 100 hours in Eco mode. The set includes 3 4 Ah batteries, a charger and an AC adapter. The batteries are compatible with the entire Ultra-Light series.

MIN/MAX HEIGHT	645-2200 mm
